HOME

PURITY TECH® – Advanced Lung-Gard®
Certified Air Quality for Residential Homes

Family health starts with the air you breathe at home
Modern homes are increasingly sealed and air-conditioned environments. Children and vulnerable individuals, with developing immune systems, spend most of their time indoors. Indoor air quality therefore plays a crucial role in health, well-being and prevention.

What is PURITY TECH®
PURITY TECH® is an all-in-one air purification filter designed to improve indoor air quality in residential homes. It is applied directly to existing air-conditioning filters and actively works against viruses, bacteria, fine particles, odors and pollutants.

Easy DIY installation
PURITY TECH® is designed for simple, do-it-yourself installation:

- Measure your existing filter
- Cut PURITY TECH® to size
- Install it inside your system

In just a few minutes, your existing system is upgraded to advanced air purification.

No performance loss

PURITY TECH® has been tested to demonstrate that:

Airflow remains unchanged

Cooling efficiency is not reduced

Indoor comfort stays the same

Cleaner air without compromising system performance.

Key features

Reduction of viruses and bacteria

Improved indoor air quality

Reduction of fine particles (PM10 / PM2.5)

Odor and pollutant control

Compatible with most residential systems

Patented technology – Made in Italy

Everyday protection for the whole family

Cleaner air means:

Greater protection for children and vulnerable individuals

Reduced exposure to airborne contaminants

Healthier and safer home environments

PURITY TECH®

Invisible technology. Real protection, every day, for those you love.
