PURITY TECH® – Advanced Lung-Gard®
Certified Air Quality for Offices, Banks and Institutional Buildings

Air quality is essential for healthy and productive workplaces

In offices, banks, insurance companies and post offices, people spend their entire working day indoors, within enclosed and air-conditioned environments. Indoor air quality directly affects health, focus, well-being and operational continuity.

What is PURITY TECH®

PURITY TECH® is an all-in-one air filtration system designed for professional and institutional environments with high occupancy. It integrates into existing HVAC systems and actively reduces viruses, bacteria, fine particles, odors and airborne pollutants.

Tested with no performance loss

PURITY TECH® has been tested to demonstrate that its purification performance does not cause any reduction in airflow or cooling capacity. Workspaces maintain thermal comfort, energy efficiency and service continuity, while benefiting from cleaner, controlled air.

Semi-annual air quality certification

PURITY TECH® enables a six-month air certification program including periodic air testing, independent laboratory analysis and issuance of an official Test Report confirming system effectiveness.

Visible certification plaques for the public

Following certification, official PURITY TECH® plaques are provided to be installed at reception or public-facing areas, clearly communicating commitment to health, safety and responsibility.

Why air certification matters for offices and institutions

- Improves employee and visitor well-being
- Reduces the spread of viruses and bacteria in shared spaces
- Supports focus, productivity and comfort
- Strengthens the image of a responsible and modern organization
- Builds trust with clients and citizens

PURITY TECH®

Invisible technology creating healthier workplaces every day.
